Professional Summary

Software Engineering student seeking an entry-level IT Support, Help Desk, or Junior Technician role. Brings experience in customer service, hardware assembly, basic troubleshooting, inventory accuracy, and process-driven work environments. Currently developing technical skills through university coursework, personal projects, GitHub, and hands-on learning.

Education

University of Technology Sydney — Sydney, NSW

Bachelor of Engineering Science, majoring in Software Engineering

Relevant Coursework: Programming 1 & 2, Database Fundamentals, Data Structures and Algorithms, Business Requirements Modelling, Information System Development Methodologies, Systems Testing and Quality Management, Software Architecture

Technical Skills & Tools

Technical Support: Basic PC troubleshooting, hardware assembly, component testing, customer support

Tools: Microsoft Office, Google Workspace, VS Code, GitHub

Programming Exposure: Basic HTML, CSS, Java, Python, SQL, React, Node.js, Express, SQLite, Arduino/C++

Workplace Skills: Communication, teamwork, problem-solving, attention to detail, time management

Languages: English, Khmer.

Experience

Azura Fresh — Sydney NSW

Pick & Pack / Warehouse Crew

Nov 2024 - Present

- Processed high volumes of stock using structured workflow procedures while maintaining accuracy and efficiency.
- Followed workplace procedures and team communication to support smooth daily operations.

Guzman y Gomez — Sydney, NSW

Crew Member / Line Crew

Apr 2024 – Nov 2024

- Worked in a fast-paced, process-driven environment while maintaining workstation readiness and organization.
- Collaborated with team members to meet service standards and complete orders accurately.

RGIS — Sydney, NSW

Retail Inventory Associate

Jun 2023 – Apr 2024

- Performed physical inventory audits to support stock accuracy.
- Used attention to detail when handling high-volume stock and meeting deadlines.

Snail Gaming — Phnom Penh, Cambodia

Customer Service & Technical Assembly

Jan 2022 – May 2023

- Built and assembled custom mechanical keyboards based on customer specifications.
- Handled electronic components including switches, PCBs, keycaps, and stabilizers.
- Tested component compatibility and keyboard functionality before customer handover.
- Resolved customer issues through basic troubleshooting, product support, and clear communication.

Projects

Behaviour-Aware Study Assistant (BASA)

University Project | React, Node.js, Express, SQLite

- Contributed to a study assistant system for task management, study tracking, and session reflection.
- Practised connecting frontend, backend, and database features while using documentation and AI-assisted learning to understand and debug code.

Animal Battle Game

University Group Assignment | Arduino/C++, RFID

- Collaborated on an Arduino-based RFID card battle game using scanned animal cards.
- Contributed to game logic, RFID scanning, testing, and basic debugging.
